Professional Summary:

Senior Java Software Developer with 7+ years of experience designing, developing, and maintaining scalable backend applications using Java, Spring Boot, and Microservices. Strong hands-on experience with REST APIs, cloud platforms including AWS and Azure, and deployment pipelines using CI/CD, Docker, and Kubernetes. Proven ability to improve performance, build reliable distributed systems, and collaborate with cross-functional teams to deliver enterprise-grade software solutions aligned with business goals.

Technical Skills:

- Languages: Java 8, Java 17, Java 21, SQL, JavaScript
- Frameworks: Spring Boot, Spring MVC, Hibernate, JUnit, Mockito, JPA, Jakarta EE, AngularJS
- Architecture: Microservices, REST APIs, Distributed Systems
- Cloud & Build Tool: AWS, Azure, Maven
- DevOps: CI/CD, Docker, Kubernetes, Jenkins, GitHub Actions, Bamboo
- Databases: MySQL, PostgreSQL, Oracle, MongoDB
- Concepts: OOP, Collections, Multithreading, JVM, Design Patterns, System Design
- IDE: Spring Tool Suite, Eclipse, IntelliJ IDEA, Visual Studio Code
- AI and Productivity: GitHub Copilot, Amazon Code Whisperer, Claude, Spring AI
- Design Pattern: Singleton, Factory, Builder and Prototype Design Pattern
- Monitoring tools: Splunk, Data Dog, Prometheus, Grafana, Postman.

Professional Experience:

Senior Software Engineer | IRIS Software

Gurugram, India | 12/2025 - Present

- Containerized services using Docker and supported deployment workflows through CI/CD pipelines and Kubernetes-based environments.
- Collaborated with product and QA teams to deliver features on schedule with strong code quality and production stability.
- Participated in code reviews, root cause analysis, and production issue resolution to improve engineering reliability.
- Used GitHub Copilot in VS Code to improve code efficiency and troubleshooting.

Associate Project | Cognizant Technology Solutions

Gurgaon, India | 02/2023 - 12/2025

- Designed and developed Java and Spring Boot microservices for business-critical workflows, improving scalability and maintainability of core applications.
- Built RESTful APIs for internal and external integrations, enabling secure and reliable communication across distributed systems.
- Worked with AWS services such as EC2, S3, RDS, SNS, SQS, and Lambda where applicable to support application hosting, storage, monitoring, and cloud-based integrations
- Implemented event-driven integration using Apache Kafka producers and consumers for asynchronous processing, real-time data flow, and better decoupling between services.
- Contributed to agile ceremonies, Jira tasks, sprint planning, and technical discussions with distributed teams.

Associate Software Engineer | HCL Technologies

Noida, India | 05/2021 - 01/2023

- Built and supported Java-based applications with focus on bug fixing, enhancement delivery, and module-level development.
- Assisted in API integration, logging improvements, and exception handling for better application reliability.
- Applied Spring Security for authentication and authorization, securing APIs with role-based access control, token-based security (JWT), and endpoint protection practices.
- Worked closely with senior developers to understand architecture patterns, coding standards, and release processes.
- Supported cloud deployment and release management activities across test and production environments.

Jr Application Developer | TSI Softtech India Private Limited

Gurgaon, India | 12/2019 – 05/2021

- Developed a Keyword-Driven Test Automation Framework using Selenium WebDriver (Java) and built web crawler bots for automated data scraping, improving efficiency and reducing manual effort.
- Worked in an Agile SDLC environment, managing builds with Apache Maven and effectively handling multiple tasks under strict deadlines.

Professional Project Details:

Client: Advarra | Clinical Research and Trial LifeScience Technology

Project Description: Advarra is a clinical research technology and services company that provides IRB oversight and trial management platforms to help sponsors, CROs, and research sites run clinical trials more efficiently. This project supported e-regulatory and e-signature capabilities used in clinical research workflows.

Responsibilities:

- **Tech Stack:** Java 17, Spring Boot, Actuator, Docker, PostgreSQL, GitHub Actions, AWS ECR.
- Worked on e-regulatory (eReg) and e-signature backend components, including document routing, access control, and audit-ready tracking for clinical trial regulatory workflows.

- Collaborated with product and QA teams to troubleshoot issues and enhance eReg/e-signature features, improving reliability and usability for research staff using these tools.

Client: Carelon Global Solutions | Healthcare and Insurance

Project Description: Carelon operates in the healthcare and insurance domain and provides digital healthcare services and operational solutions that help make care delivery and claims-related processes more connected and efficient. It includes cashless claim-style processing.

Responsibilities:

- **Tech Stack:** Java 17, Spring Boot, REST API, Docker, Kubernetes, Bamboo, Oracle, IBM DB2, MongoDB, SonarQube.
- Built concurrent processing solutions using multithreading design and Java virtual threads for suitable I/O-intensive use cases, helping improve throughput, responsiveness, and thread management efficiency.
- Built migration solutions for Spring Boot version upgrades, modernized backend components, and applied Spring Security, Kafka, and AWS-based support capabilities to strengthen reliability and platform readiness.

Client: Staples Inc. | E-commerce Retail and Business Services

Project Description: Staples is an office supplies company serving consumers and businesses through retail stores, online channels, and business service centers, including office products, printing, shipping, and technology services. This project focused on backend services that support online ordering and payment flows in Staples' e-commerce-style journeys.

Responsibilities:

- **Tech Stack:** Java, Spring Boot, Azure, PostgreSQL, Git
- Worked on payment-side backend components for Staples, handling service integration, validation, and transactional request processing for checkout and payment flows.
- Collaborated with cross-functional teams to troubleshoot payment issues, support releases, and improve reliability and observability of payment services.

Education Details:

B.E. (Computer Science) RGPV - Gwalior Institute of Information Technology (2018)

12th (Math) MP Board - Govt. Haridershon School (2014)

10th MP Board - Saraswati Gyan Mandir (2012)

Certifications:

- AWS certification Developer – Associate (Udemy)
- GitHub Copilot prompts (Udemy)
- Angular deep Dive (Udemy)
